Do not delete or move the location of columns on the Populated File. To upload correctly, the file's columns cannot be deleted or reordered.

Deleting students from this file will not remove them from your roster. If you need to remove students from your roster, please contact your Outreach Coordinator or use the "Transfer Out" function. You can upload the updated populated file with blank information – it will not change anything in ScholarTrack.

The VLOOKUP function is highly recommended when completing Graduation Details Reporting if you are working with large cohorts of students, especially. You can use STN as the common value between the Populated File and your SIS File. Your Outreach Coordinator can provide resources to learn how to use this function.

5. Uploading updated Populated File

Choose "Upload" under Import Details and select the appropriate file you want to upload.

Status will change from "Uploading" to "Complete" once the upload has finished.

Leaving the page or closing the browser will not disrupt the uploading process – uploading can take a few minutes to a few hours depending on the file size and how many files are in the queue to be uploaded. *However, we ask that you come back to the page to check on the status a few hours later or the next day. Further action may be needed.*

The bule, red, and green buttons under "Actions" indicate the following:

Blue – Original File (XX records)

This is the original file that was uploaded with the number of students (records) that were included. You may need this to refer to.

Red – Error File (XX records)

土)

*

This file shows how many records had issues and will need correcting. These records require additional action to correctly upload. An Error Message will be included in the file with a description of the issue. Please contact your Outreach Coordinator if you need support with the errors you see.

Correct errors on the error file, delete the error message column, and rename the file for your records. Re-upload the file for the students that needed corrections.

Green – Success File (XX records)

This file shows the number of records that were uploaded successfully. No further action for those records is needed.

Individual Student Graduation Details Reporting:

1. Navigate to the Graduation Details tab. Scroll down to "Students" under the Graduation

Details section and click the icon for the student you would like to edit.
